Messaging Footnotes

[1] Based on internal HP testing with top two market share leaders in the entry rigid market (2025). HP Latex R530 requires less operational space than any conventional 4x8ft flatbed printer, which typically occupies over 28 sqm. This allows for better space efficiency in customer facilities.
[2] For HP's large-format printers, HP PrintOS Production HUB is compatible with HP Latex printers and the HP Stitch Printer series. HP PrintOS Production HUB premium features are only accessible when purchasing an HP Professional Print Service Plus Plan.
[3] Target customers for the HP Latex R530 Printer are traditionally using a Print&Mount technique, using a rigid material and sticking a self-adhesive vinyl on top. With the HP Latex R530 Printer, they would print directly on the rigid material, saving on average 250 m² of self-adhesive vinyl per month, thus reducing the amount of material used and disposed of.
[4] Based on recyclability evaluation, printing with the HP Latex R530 Printer on 3A DISPA Plus, Neenah ImageMax, Reboard Honeycomb Brown, Kaemmerer Chantaffiche 200 JE and HP Premium Poster Paper. Test conducted by TU Darmstadt Fachgebiet Papierfabrikation und Mechanische Verfahrenstechnik PMV according to PTS-RH 021 category 2.
[5] The HP Sustainability Amplifier program helps customers reduce their environmental impact through self-assessment, resources, and recognition with an HP badge, not an official eco-label. Recognition is subject to approval for credibility. Program is only available in English.
[6] Based on odor sensory evaluation when printing with the HP Latex R530 Printer. Tests done in a 57 m² room with 5ACH. Test conducted by Odournet following the standard VDI3882, where the HP Latex R530 Printer air quality was characterized, when printing, as "neutral" to "slightly pleasant" for hedonic tone.
[7] Applicable to HP Latex Inks. Based on sensory evaluations conducted by Odournet, done according to VDI Guideline 3882 where 873 inks were characterized as "weak" in odor intensity and "neutral" for hedonic tone. There is a broad set of media with very different odor profiles. Some of the media can affect the odor performance of the final print.
[8] UL ECOLOGO® Certified HP 873 inks meet a range of stringent human health and environmental considerations. For certifications, see www.ul.com/EL and www.ul.com/gg
[9] Recycled plastic is expressed as a percentage of the total weight plastic. Post-consumer recycled content is based on the definition set in the EPEAT standard for imaging equipment, IEEE 1680.2.
[10] The new maintenance cassette has at least 50% more life (Liters of inks) thanks to a 50% longer cleaning cloth and to the new ink collection unit that helps use 100% of the cleaning cloth for all users compared to previous model available in Latex 700/800.
